

Cut out Tubby Antennae

What you'll need:
Paper cutter or scissors
and clear tape

Instructions:

- Print out the antenna headband templates onto paper or thin card.
- Help your little one to select their favourite, then cut it out to form the front of their headband.
- Cut out an additional strip of card (the same width as the bottom of the antenna) to form the headband.
- Encourage your little one to decorate both parts of their headband – the brighter the better!
- Talk about the different colours and shapes in their design.
- Carefully stick the back and front of the headband together using glue or sticky tape, making sure it's the right fit. You may find the antenna needs some extra support.
- You can attach a lolly stick or small strip of thicker card to the back of the antenna's stem to make sure it stays standing.
